Auto Generator Start

(Optional)

2006 Cheetah

The information printed here reflects product design, fabrication, and component parts at the date of printing. The manufacturer reserves the right, at any time, to make changes in product design or material or component specifications as its sole option, without notice. This includes the substitution of components of a different brand or trade name, which will result in comparable performance. All information printed in this document is subject to change after the date of printing. Due to product improvements, changes during the model year and/or transcription errors that may occur, information represented within the owner's manual and/or this document may not be accurate at the time of your purchase. Please confirm any information with your dealer.

Disregard the following information in 2006 Cheetah Owner's Manual, **Section 8 - Electrical-House** on page 212. This information does not apply to the 2006 Cheetah.

Auto Generator Start (Optional)

The Auto Gen Start (**AGS**) allows the inverter remote control to start the generator when battery voltage or interior motorhome temperature reaches a preset point.

NOTE:

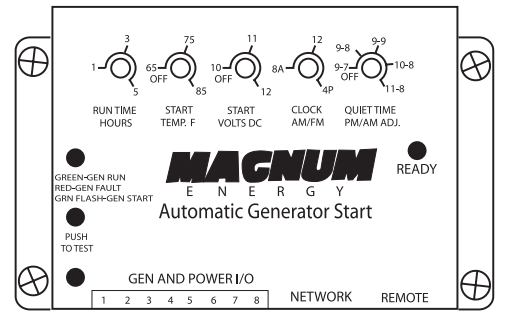

Battery voltage and interior temperature settings for the AGS function are selected with the AGS controller located in the inverter bay. Refer to the OEM manual located in the Owner's Information File Box for detailed instructions.

To Enable AGS:

- Press the **AGS** button on the inverter remote control. Use the select knob to scroll through the **AGS** menu options until "**AutoGenSt Enabl**" appears. Press the select knob to activate the **AGS**.

To Disable AGS:

- Press the **AGS** button on the inverter remote control. Use the select knob to scroll through the **AGS** menu options until "**AutoGenSt OFF**" appears. Press the select knob to deactivate the **AGS**.
